Flush Casement Window

Lignum timber flush sash casement windows offer a classic design that suits any property style. A popular choice for replacing traditional windows, the flush sash frame can also be paired with contemporary glazing bars and hardware for house remodeling projects or new builds.

Externally, the outerframe and sash are flush and feature slim sightlines to provide a larger glass area. The window system is internally beaded to enhance security, is certified to PAS 24:2016 and has achieved Secured by Design accreditation.

The Lignum Flush Casement Window is A rated for energy efficiency and has a U-Value of 1.3 W/m²K with a warm edge Low-E argon filled double-glazed unit. U-Values of 1.0 W/m²K or below can be achieved with triple-glazing.

Single Door (Open Out)

Lignum timber entrance doors are available to open either outward or inwards.

This outward opening version is a popular option where there is limited space to open inwards, when used for mobility access or for rear doors.

The Document Q compliant door is energy efficient and highly secure. The door design is very flexible, allowing for various glass and solid panel combinations. This makes it easy to produce almost any style of door.

For wide entrances see the Lignum Double Door option.
